📄 PROFILE

Frontend Developer with over a year of hands-on experience architecting responsive, accessible, and high-performance user interfaces for government, healthcare, agriculture, and e-commerce platforms. Strong command of HTML5, CSS3, modern JavaScript, and Bootstrap, with working knowledge of React. Proven ability to translate complex UI/UX designs into clean, reusable, mobile-first components, integrate REST APIs for dynamic data, and deliver WCAG-compliant interfaces on large-scale, public-facing projects for government and regulatory bodies.

🧠 SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), jQuery, Bootstrap, React (working knowledge)

UI/UX & Accessibility: Design-to-code translation, responsive/mobile-first layouts, WCAG accessibility (screen reader support, keyboard navigation, font controls), cross-browser compatibility

Tools & Workflow: Git, GitHub, Postman, npm, REST API integration

Backend familiarity: PHP, Laravel, MySQL (used for API integration and collaboration with backend services)

🎓 EDUCATION & CERTIFICATES

Maulana Mazharul Haque Arabic & Persian University (MMHAPU) 🌐, Bachelor of Computer Applications (BCA)

2022 – 2025

Arena Animation, Web Development
HTML, CSS, and JavaScript fundamentals; built responsive projects.

📁 PROFESSIONAL EXPERIENCE

Frontend Developer, Meadows Infotech 🌐

04/2025 – Present

- Architected and delivered responsive, high-performance user interfaces using HTML5, CSS3, JavaScript, and Bootstrap across multiple government, healthcare, and agriculture platforms.
- Translated complex UI/UX designs into clean, scalable, reusable frontend components, streamlining development and improving consistency across projects.
- Integrated REST APIs to power dynamic, data-driven interfaces, collaborating closely with backend Laravel services to ship features end-to-end.
- Refactored and optimized frontend code for performance, reducing redundancy through reusable, componentized patterns.
- Enforced cross-browser compatibility and WCAG accessibility standards across all public-facing pages, ensuring usability for government and regulatory audiences.

📁 PROJECTS

Delhi Bhartiya Chikitsa Parishad (DBCP) 🌐, Government portal

- Engineered the frontend for an official government portal for Delhi's Ayurvedic medicine regulatory body, precisely replicating layouts, navigation, and carousels to match design specifications.
- Delivered the practitioner registration and renewal interfaces used by licensed professionals statewide.
- Built in accessibility features including screen reader support and adjustable font controls, widening access for a broader range of users.

Cane Advisory Services (CAS) 🌐, Agriculture platform, Govt. of Bihar

- Engineered the frontend for a state-backed agriculture advisory platform under the Chief Minister Cane Development Program, serving sugarcane farmers across Bihar.
- Delivered UI modules covering variety selection, pest & disease identification, nutrient management, and plant protection guidance.
- Built the admin panel interface enabling staff to manage crop data, farmer queries, and real-time advisory content.

Unani Temperament Assessment 🌐, Health portal, Ministry of AYUSH

- Engineered the frontend for a health assessment portal under the Ministry of AYUSH, Government of India.
- Delivered an interactive Mizaj quiz interface generating personalized diet and lifestyle recommendations for users.
- Built the frontend for user authentication flows, the admin panel, and media gallery management.

APMC Azadpur Delhi 🌐, Government portal

- Delivered the frontend for an official portal for the Agricultural Produce Marketing Committee (APMC) Azadpur, established in 1977.
- Gave the regulatory committee a public digital presence, connecting the portal to traders and farmers across the region.
- Designed a bilingual (Hindi & English) UI serving regulatory notices and market updates to the public.
